Art Unit: 1614

Claims 3, 5-11 and 13-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention, the requirement having been traversed in Paper No. 2.

Cancellation of non-elected claims and non-elected subject matter from the other claim is now required.

The claims are still being examined as they read on the elected enhanced combination.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1614

Claims 1, 2, 4 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Makonkawkeyoon et al., reference of record taken with the Pardee et al. patent of record for the reasons fully set forth in Paper No. 4, pages 2 and 3.

Applicants' remarks are noted but ^{one} ~~the~~ skilled in art would be motivate to combine the two anti-AIDS treatment drugs for their additive effect and the specification fails to set forth any data showing an unexpected results for the claimed elected enhanced combination.

This action is made final,
